Questions

**Our job as developers is to preserve the
accessible nature of HTML**

Keeping it POSH

Plain old semantic html

1. Structure your document with elements based on their meaning.
2. Varying benefits other than accessibility
 - SEO ranking
 - Responsive across devices particularly mobile
 - Easier to understand plus most elements have built in functionality - saves time having to rewrite it

```
<div>
  <span>Three words</span>
  <div>
    <a>one word</a>
    <a>one word</a>
    <a>one word</a>
    <a>one word</a>
  </div>
</div>
<div>
  <div>
    <div>five words</div>
  </div>
  <div>
    <div>three words</div>
    <div>forty-six words</div>
    <div>forty-four words</div>
  </div>
  <div>
    <div>seven words</div>
    <div>sixty-eight words</div>
    <div>forty-four words</div>
  </div>
</div>
<div>
  <span>five words</span>
</div>
```

```
<header>
  <h1>Three words</h1>
  <nav>
    <a>one word</a>
    <a>one word</a>
    <a>one word</a>
    <a>one word</a>
  </nav>
</header>
<main>
  <header>
    <h2>five words</h2>
  </header>
  <section>
    <h2>three words</h2>
    <p>forty-six words</p>
    <p>forty-four words</p>
  </section>
  <section>
    <h3>seven words</h3>
    <p>sixty-eight words</p>
    <p>forty-four words</p>
  </section>
</main>
<footer>
  <p>five words</p>
</footer>
```

The Page & Structure

1. Provide <title> for a page -
2. Set the default language (lang) - ISO language codes recommended
3. Use appropriate sectioning elements - to provide structural context
4. Sequence of heading levels is important to convey importance

<nav>

<main>

<article>

<footer>

Use semantic controls

1. Browsers allow controls to be manipulated with the keyboard
2. Focus states, tabbing - all built in to these elements when used correctly
3. Longer time to rebuild the functionality of an element into another.
4. Help users differentiate elements with appropriate styling

`<div> Click me </div>`

Use meaningful text labels

1. Using text that describes an expected action is great for users and screen readers.
2. Ensure the text makes sense in and out of the context being used
3. Use distinctive text labels for links, buttons - avoid “Click here” “Click me”
4. You can make use of descriptions in addition to a `<label>` to give a user more context.

Email address (required):

Please provide a valid email address using the format name@place.com

Description has been provided to the user.

Text alternatives

1. Make provision for transcript of audios used on your site
2. Descriptions are needed when there is a visual accompanying the audio
3. Text tracks is to be included with video content:
 - Subtitles
 - Closed captions (cc)
 - Descriptions
 - Chapter titles
4. Use the alt attribute to provide context as to what an image displays - if not for decorative purpose
5. Figures and figure caption

Links

1. Ensure that the `<a>` element is styled to give the impression that is a link.
2. Avoid using onclick events with the `<a>` tag
3. Skip link -
 - placed at the beginning of the page
 - Used to bypass content on a page
4. Use an indicator to inform the user if the link is external or a file.

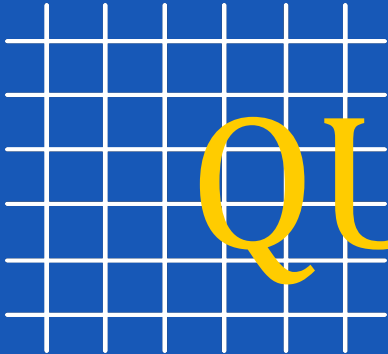

Tables

1. Use headers to show association between cells.
2. Captions will provide context or description of the table content.
3. Provide structure to the table with use of `<thead>` `<tbody>` `<tfoot>`
4. The `scope` attribute added to the `<th>` tells what cells a header is for.

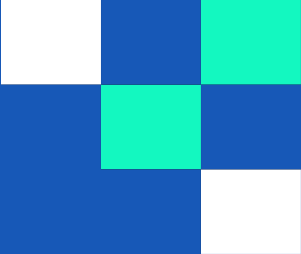

Practice

A decorative graphic consisting of a 6x6 grid of thin white lines on a blue background, positioned to the left of the word 'QUESTIONS?'.

QUESTIONS?

A decorative graphic in the top right corner consisting of a 3x3 grid of squares in white, blue, and cyan colors.A decorative graphic in the bottom left corner consisting of a 3x3 grid of squares in white, blue, and cyan colors.

THANK YOU

The image features a solid blue background. On the left, there is a white grid of 6 columns and 6 rows. A yellow circle is positioned at the intersection of the 3rd column and 4th row. A white rectangular frame, resembling a 3D box, is partially overlaid on the grid, with its top edge containing the text 'THANK YOU' in white, bold, sans-serif capital letters. Various white geometric shapes are scattered around the central frame, including triangles, circles, and lines. In the bottom right corner, there is another white grid, this one with 4 columns and 3 rows.
